

AI LAUNCH PAD 2: CREATE AND PROVE YOUR RAPID AI PROTOTYPE

with Digital Command

Move Beyond AI Theory—See It in Action

AI is no longer a concept—it's a tool we can put to work today. Our consulting engagement helps you rapidly deploy a functional AI chatbot customized for your business workflow—HR, marketing, customer support, and more.

For technical and business teams validating AI before full-scale deployment.

This engagement delivers a functional AI prototype, tested outside your firewall, using only approved content and processes to streamline workflows and enhance engagement safely.

Engagement Steps

1. **Discovery** – Identify workflows and key use cases for AI.
2. **Configuration** – Set up and implement AI to align with your processes and data.
3. **Tailoring** – Customize AI using your knowledge base and FAQs.
4. **Deployment** – Launch in a live environment for real-world testing.
5. **Evaluation** – Gather insights, refine AI, and plan for full-scale integration.

What We'll Accomplish Together

- **Build & Customize:** We create an AI chatbot using a no-code/low-code tool, tailored to your needs.
- **Tailor with Your Knowledge:** We tailor the bot on company FAQs, customer-facing content, and documentation you select.
- **Develop Test Dataset:** Create a dataset of user queries that simulate real-world customer interactions
- **Deploy & Test:** We launch your AI assistant on a dedicated landing page outside your firewall and organization to keep it safe.

Investment:
Fixed Price Engagement

Outcomes and Results

1. Business strategy and AI roadmap alignment
2. Chatbot Deployment & Customization
3. Testing & Performance Optimization
4. Business Impact & ROI (eg. engagement and conversion)
