

AI LAUNCHPAD 3: PROTOTYPE AN ADAPTIVE INTELLIGENCE ENGINE

with Digital Command

Turn Information into Actionable Intelligence

AI is only as powerful as the insights it delivers. Build an enterprise intelligence engine that retrieves, processes, and delivers real-time, context-aware knowledge—helping teams work smarter, decide faster, and automate workflows.

For business and technical leaders launching their first AI-powered knowledge retrieval and decision system.

This engagement ensures AI ingests, processes, and delivers business-specific insights in real time, boosting productivity and empowering teams with decision-ready intelligence.

Engagement Steps

Phase 1: Knowledge AI & Readiness – Identify AI integration points & impact goals based on existing assets.

Phase 2: Intelligence Engine Development – Architect, train, and deploy AI models.

Phase 3: AI Integration & Deployment – Connect AI to business apps (CRM, ERP, LMS, HRIS).

Phase 4: AI Adoption & Optimization – Training, tracking, and continuous improvement.

What We'll Accomplish Together

- **Identify Data Bottlenecks** – Scope data requirements and automate tasks.
- **Build an AI Knowledge Engine** – Enable real-time, context-aware insights.
- **Integrate AI into Workflows** – Connect AI with business systems for automation.
- **Ensure Continuous Optimization** – Implement feedback loops to refine AI accuracy and adaptability.

Investment:
Fixed Price Engagement

Outcomes and Results

1. **Operational AI System** – AI retrieves, processes, and delivers business insights.
2. **Faster Decisions** – Teams access real-time, AI-curated knowledge instantly.
3. **Automated Workflows** – AI streamlines search and eliminates knowledge gaps.
4. **Competitive Edge** – AI-driven insights enhance efficiency and expertise.
